[Portfolio](#) / [GitHub](#) / [LinkedIn](#)

## 01 PROFESSIONAL SUMMARY

Unity-focused game developer with experience in senior development roles, published mobile games, Roblox experiences and AR/VR training simulations. Builds multiplayer networking, FSM-based AI and gameplay systems, with hands-on experience in backend integration, content loading and performance optimization.

## 02 TECHNICAL SKILLS

**Engines & platforms:** Unity, Unreal Engine, Roblox, Godot, Three.js; AR/VR, WebGL

**Programming:** C#, C++, JavaScript, Python, Luau, React; SOLID principles and programming patterns

**Gameplay & systems:** Game AI, FSM (finite state machines), animation blend trees, inventory, save systems, quests, character customization, touch input, UI/VFX, Unity editor programming

**Networking & backend:** PurrNet, FishNet, Photon PUN, Photon Fusion, DarkRift 2, WebRTC, REST APIs, Firebase, PlayFab, AWS dedicated servers

**Production & tools:** Addressables, asset bundles, HDRP, Shader Graph, Blender, Git

## 03 PROFESSIONAL EXPERIENCE

### Unity Developer

Nov 2023 - Present

Next IT LTD. | Smart Table

- Develop interactive mini-games and smart restaurant features with split-screen and touch-input support.
- Refactor project code, implement game AI, and create UI animations and visual effects.
- Optimize HDRP performance; integrate REST APIs and develop custom Unity editor tools and shaders.

### Senior Game Developer

Mar 2023 - Oct 2023

Supertal Pte. Ltd. | Persib Bandung Metaverse

- Implemented DarkRift 2 multiplayer networking and REST API integrations for a metaverse experience.
- Built FSM-based NPCs with dynamic interactions and integrated Firebase and PlayFab services.
- Enabled dynamic content loading with asset bundles and Addressables; optimized gameplay and shaders.

### Senior Game Developer

Aug 2022 - Dec 2022

Royex Technologies | Metaverse projects

- Developed multiplayer gameplay, animation blend trees and finite state machines for metaverse projects.
- Worked on dedicated game servers hosted on AWS, WebGL builds and WebRTC in-game voice chat.

04

## PROFESSIONAL EXPERIENCE / CONTINUED

**Senior Unity Developer**

Mar 2022 - Aug 2022

**March Robotics And IT Solutions** | Bangladesh Army training simulations

- Implemented VR systems for training simulations, including VR treadmill interactions.
- Worked on database connectivity, animations and Blender assets for simulation projects.

**Unity Game Developer**

Jul 2021 - Dec 2021

**Hi Tech Bangla, Bangladesh** | Tactical communication training simulation

- Developed a Unity radio communication simulation for Bangladesh Army tactical training.
- Integrated VR and AR features and applied structured programming patterns.

**Game Developer**

Feb 2021 - Oct 2021

**Free Pixel** | Hyper-casual games, playable ads and live operations

- Created hyper-casual games from scratch and prepared game design documentation.
- Implemented localization, in-app purchases and game UI.
- Built playable advertisements using Luna Playables, Cocos2d-JS and ImpactJS.
- Worked on live operations and in-game events.

05

## PUBLISHED GAMES &amp; ROBLOX CONTRIBUTIONS

**Clean a Crime****ROBLOX** | Contributed to this Roblox experience.**OMG! This Place Is DISGUSTING****ROBLOX** | Contributed to this Roblox experience.**Bullet Rush****ANDROID / GOOGLE PLAY** | Run-and-gun shooter with enemy waves, weapon upgrades and touch controls.**Double Dash****ANDROID / GOOGLE PLAY** | Arcade driving game with simultaneous two-car control and power-ups.**Bus Stop Rush****ANDROID / GOOGLE PLAY** | Traffic puzzle focused on managing buses and passengers.**Ball Sorting Puzzle****ANDROID / GOOGLE PLAY** | Color-sorting puzzle with touch controls and increasingly challenging levels.**PUBLISHED UNITY TOOL | Easy Interaction System**

Reusable interaction-system package available on the Unity Asset Store.

06

## EDUCATION

**B.Sc. in Computer Science** | BRAC University | 2020**Gameplay demos & project breakdowns:** [sayedturzo.github.io](https://sayedturzo.github.io)
